Expert Workshop

Strengthening Monitoring, Control and Surveillance (MCS) in the Southeast Pacific

14-15 November 2019

CPPS Headquarters, Guayaquil, Ecuador

ABIDJAN CONVENTION
CONVENTION D'ABIDJAN

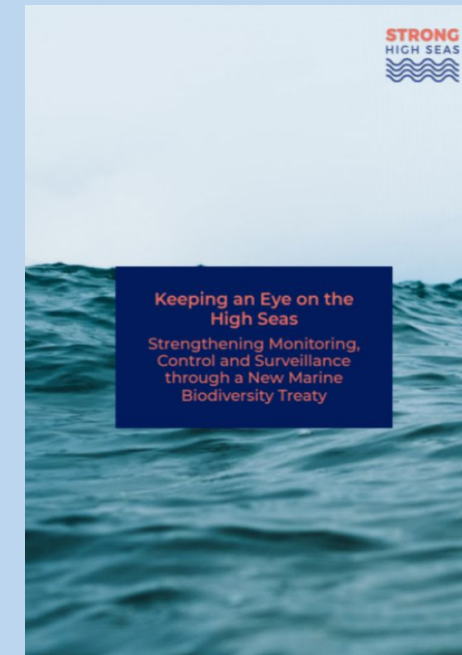

IDDRI

International Ocean Institute
African Region

- Reunión de expertos I – Paris, July 2018
- Reunión de expertos II – Paris, April 2019
- Taller de MCS CPPS
- Taller de MCS Abidjan – 2020
- Informes sobre tecnología / política

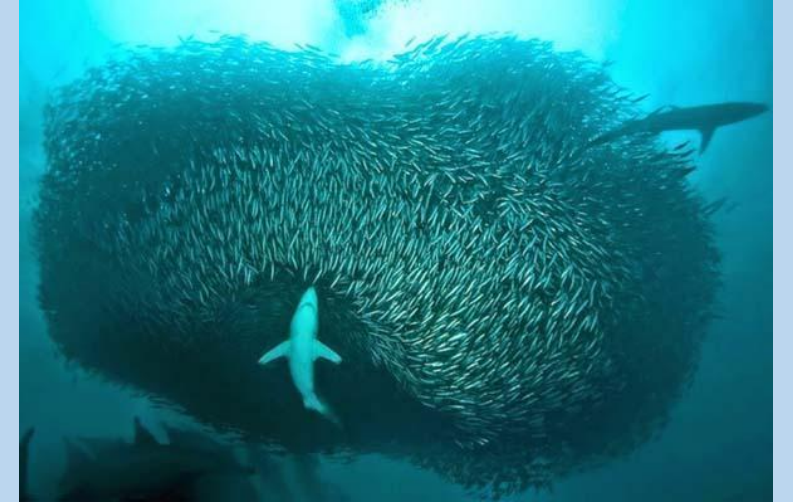

What is MCS and why is it important?

- a) **Monitoring** - the continuous requirement for the measurement of fishing effort characteristics and resource yields;
- b) **Control** - the regulatory conditions under which the exploitation of the resource may be conducted;
- c) **Surveillance** - the degree and types of observations required to maintain compliance with the regulatory controls imposed on fishing activities.

Source: FAO, 1981

What is MCS and why is it important?

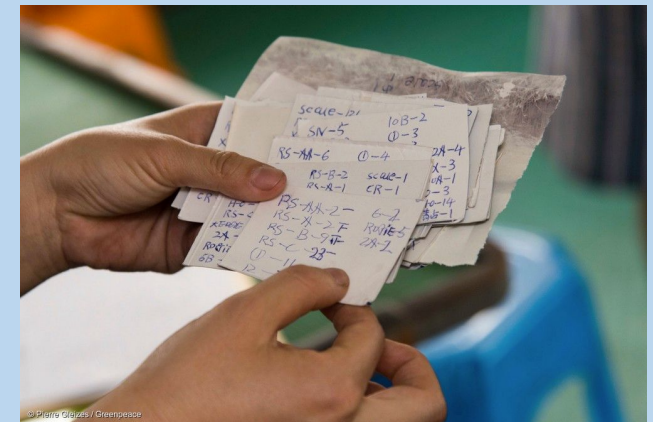

An overview of MCS tools

What factors need to be taken into account when choosing MCS tools?

- Purpose
- Costs
- Access
- Reliability
- Coverage
- Cross-checking data
- Ease of manipulation
- Privacy considerations
- Capacity to analyse data
- Different actors/stakeholders

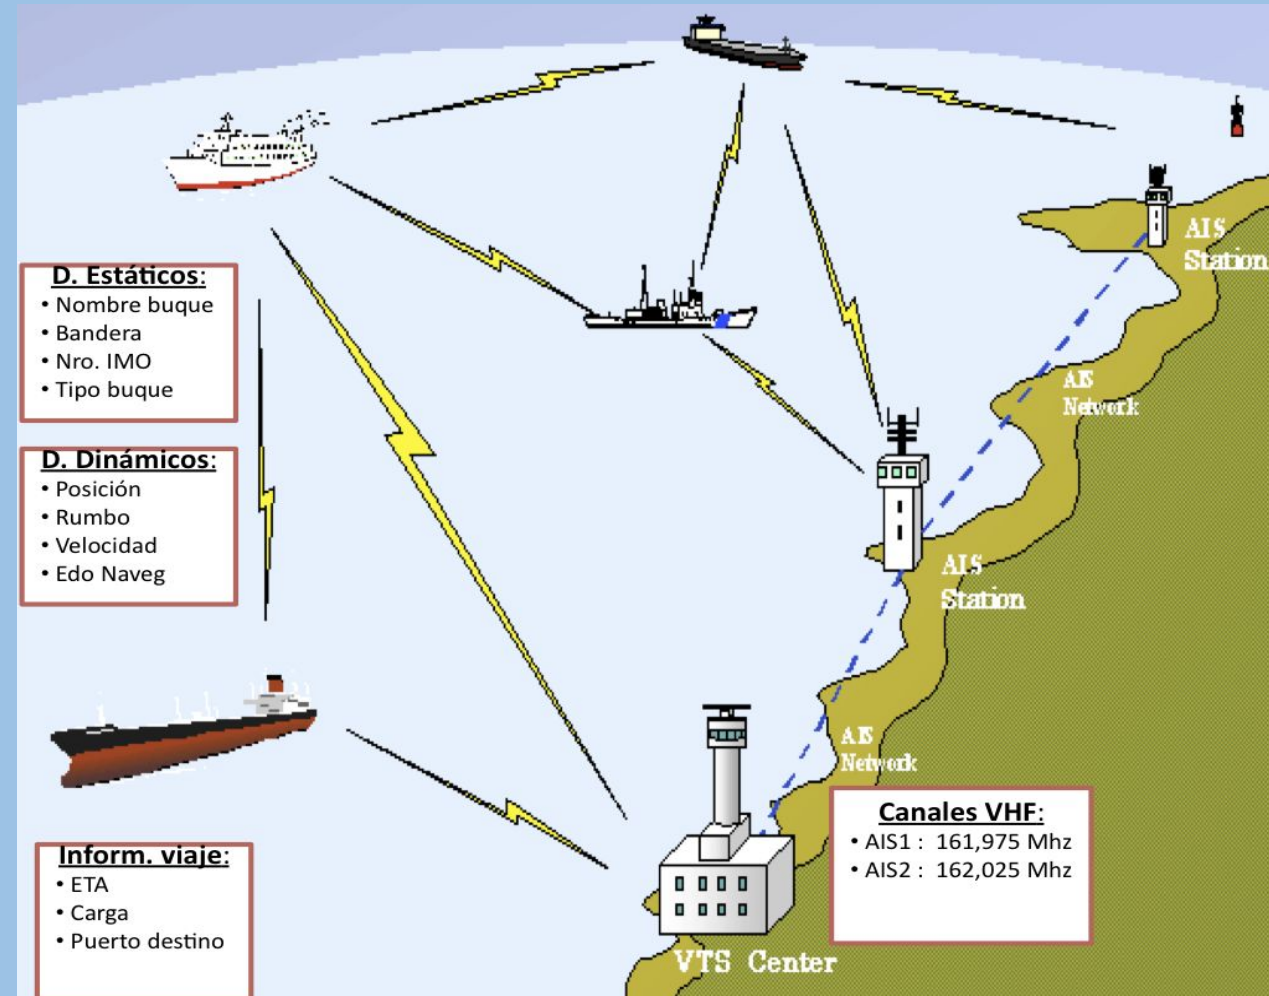

- Patrulleros
- Observadores
- Libros de registro

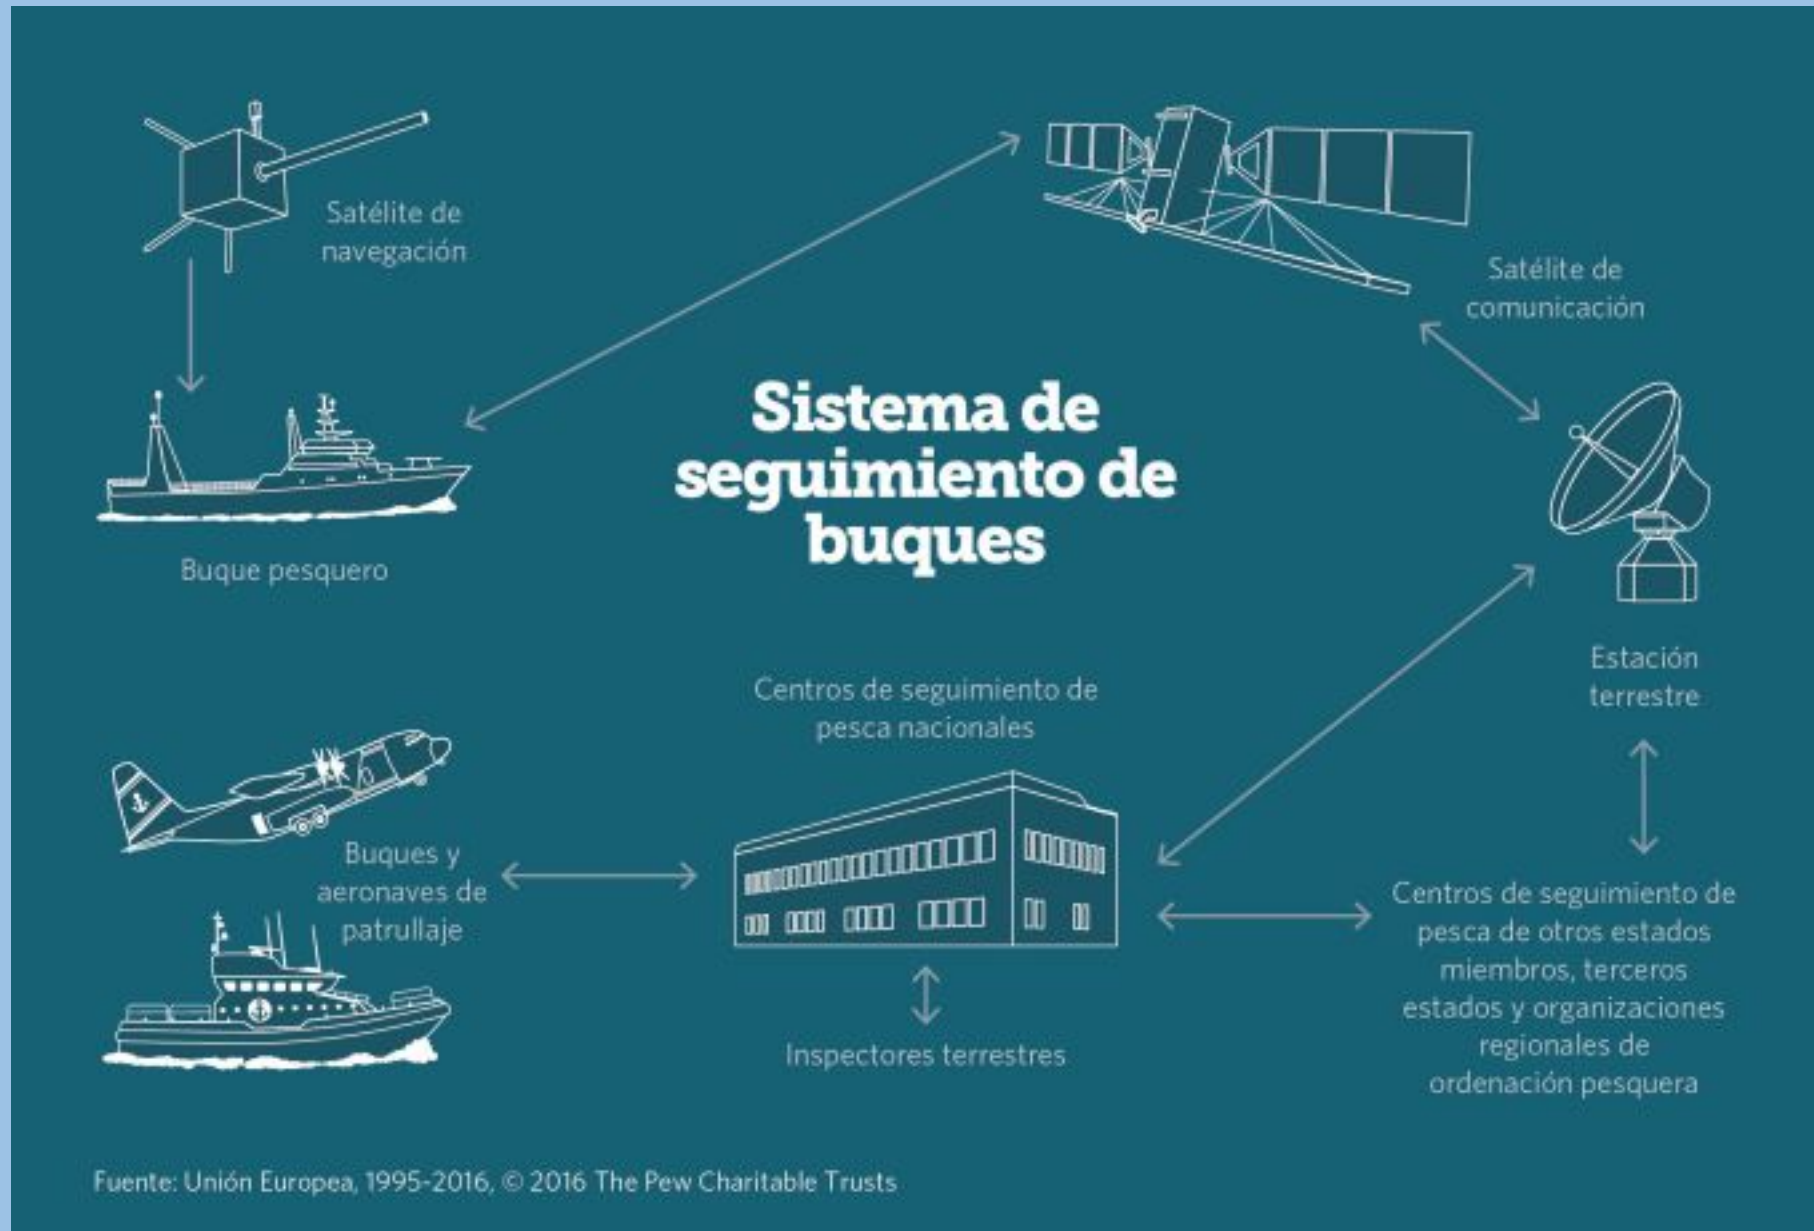

Herramientas tecnológicas

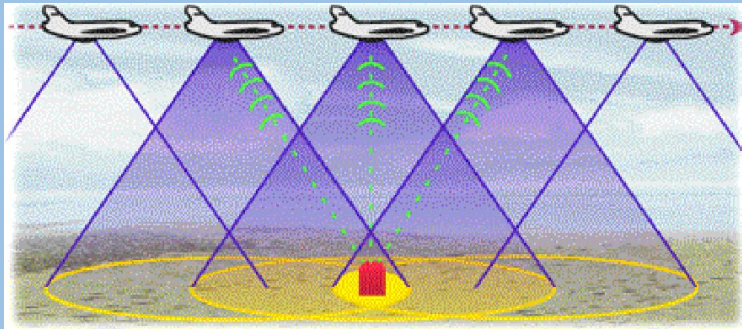

Sistemas de identificación automática (AIS)

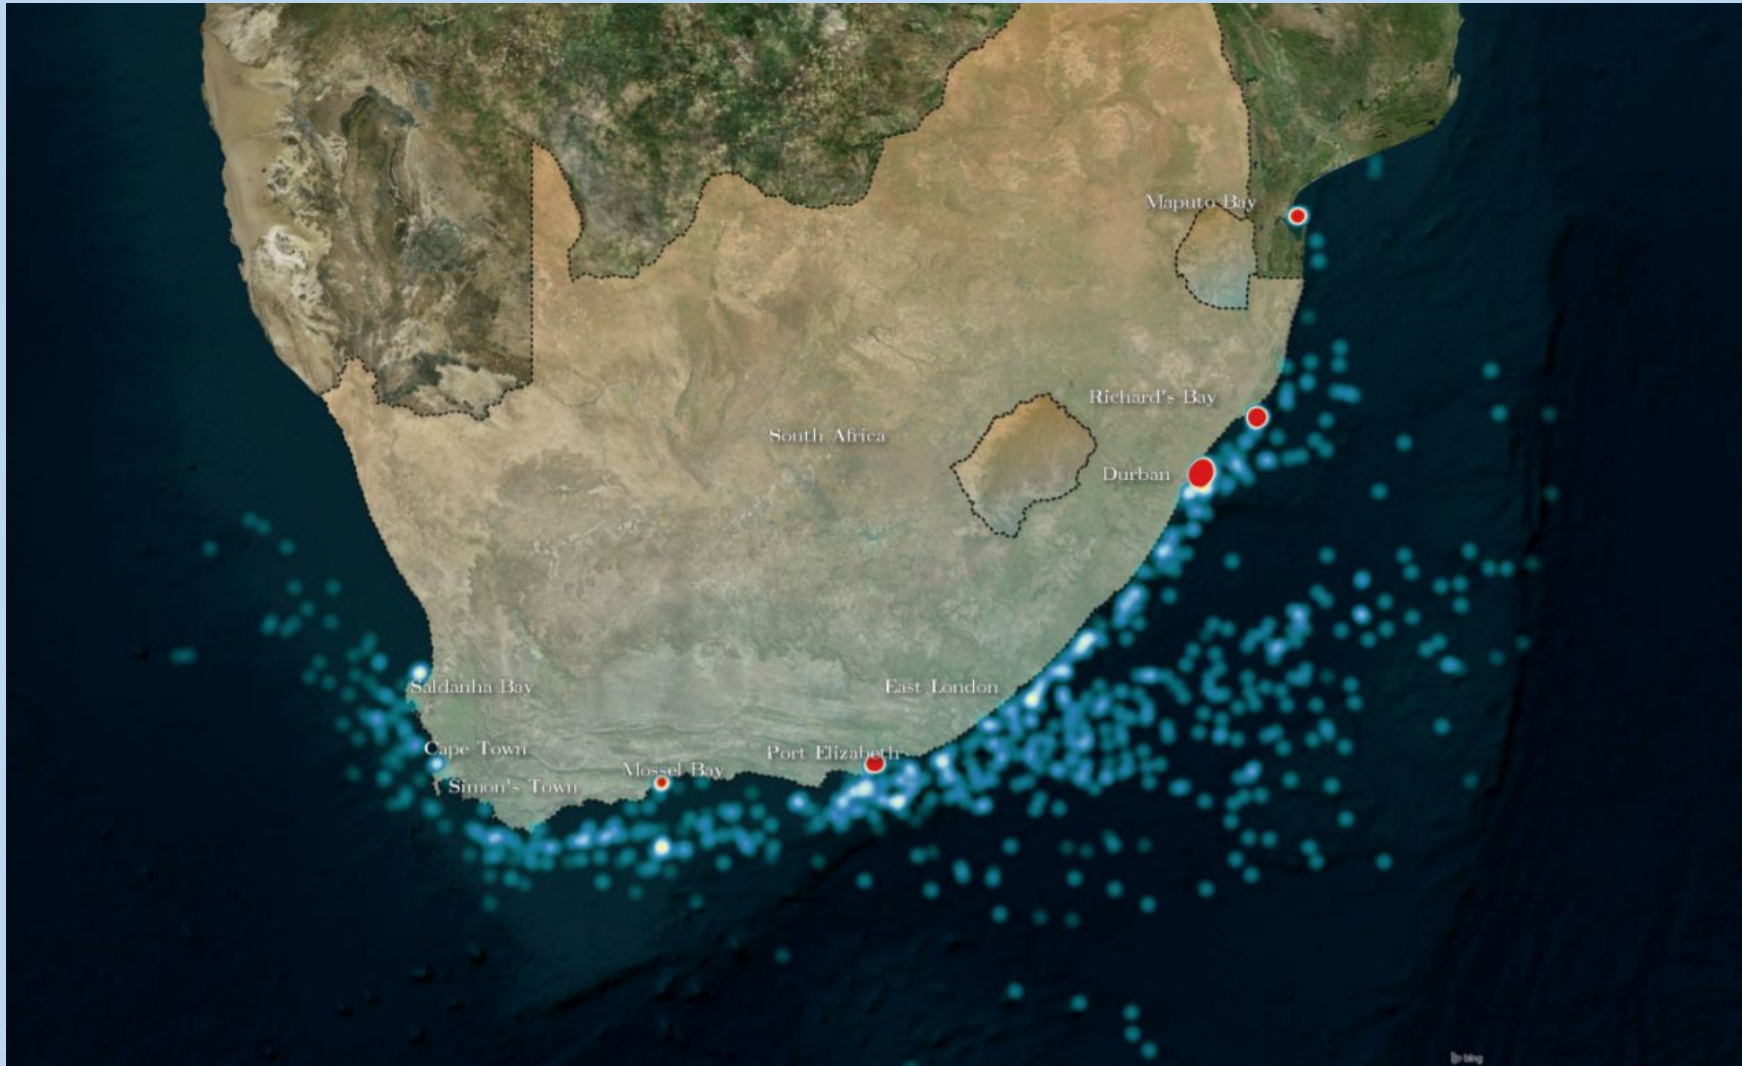

Sistemas de seguimiento de barcos pesqueros (VMS)

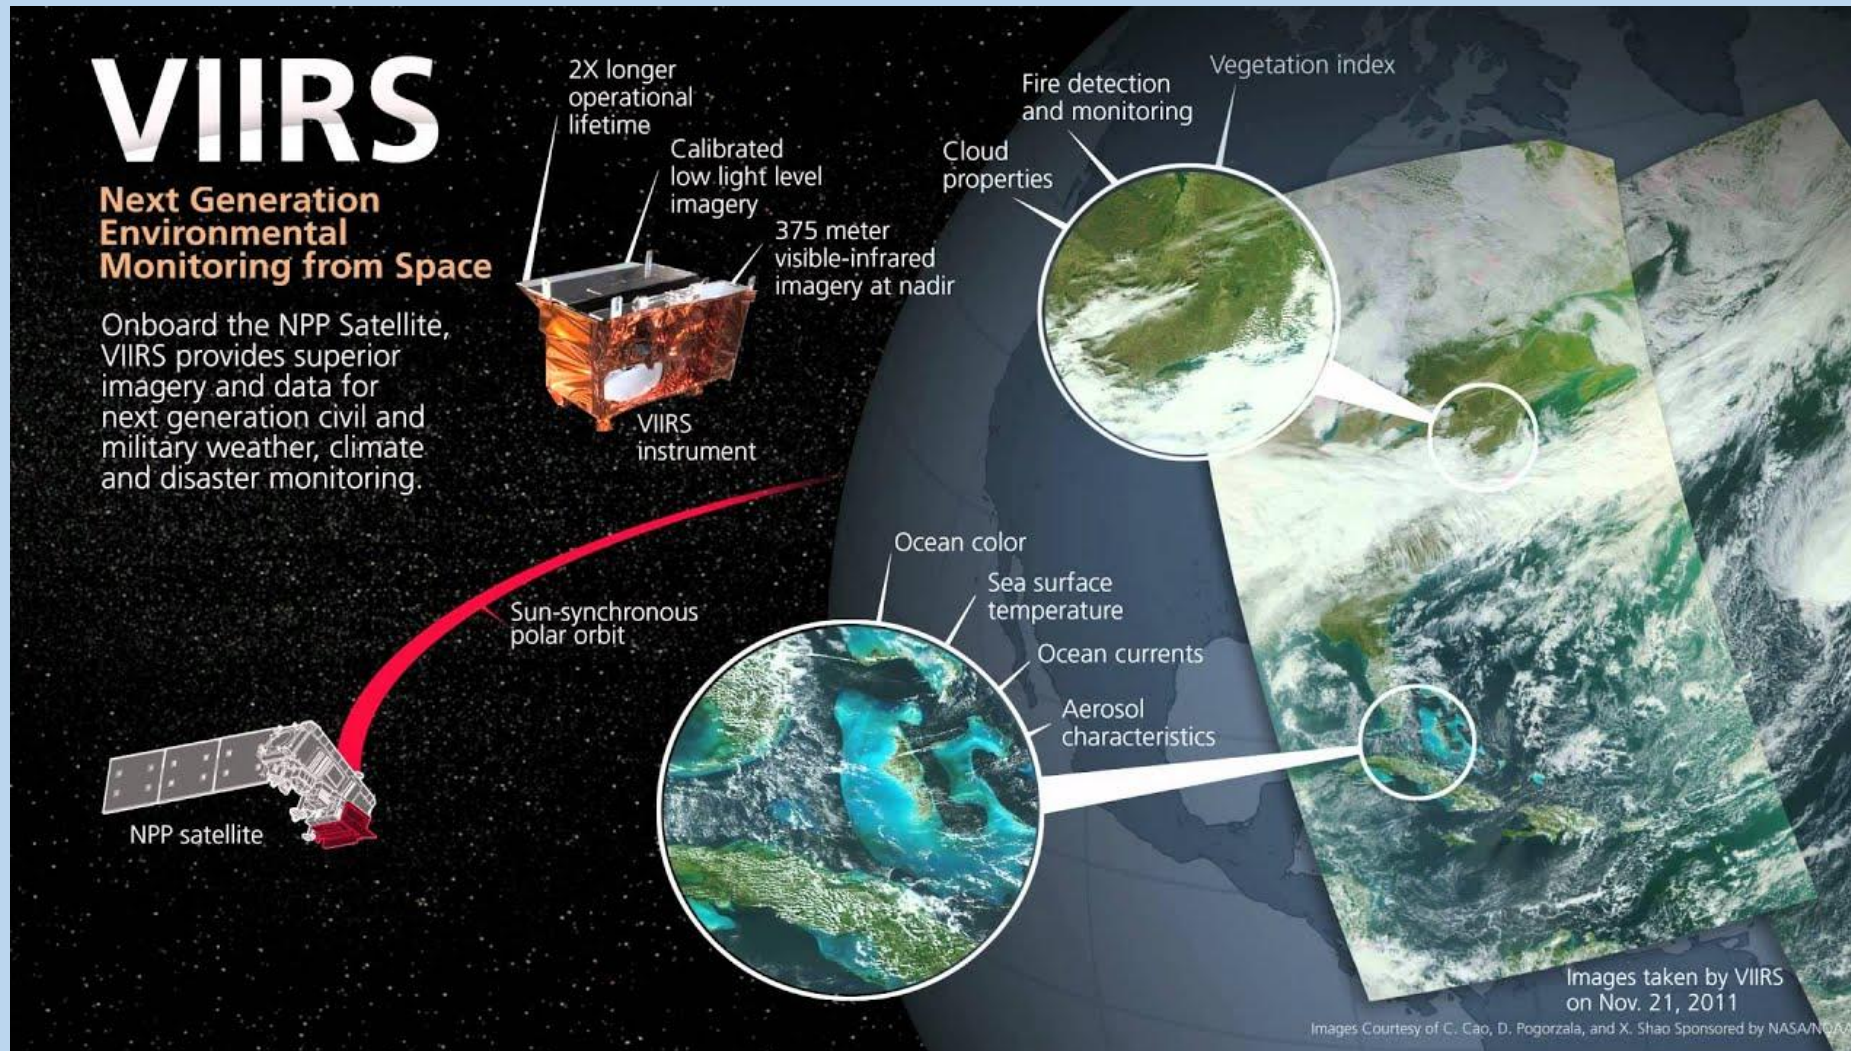

Radar de abertura sintética (SAR)

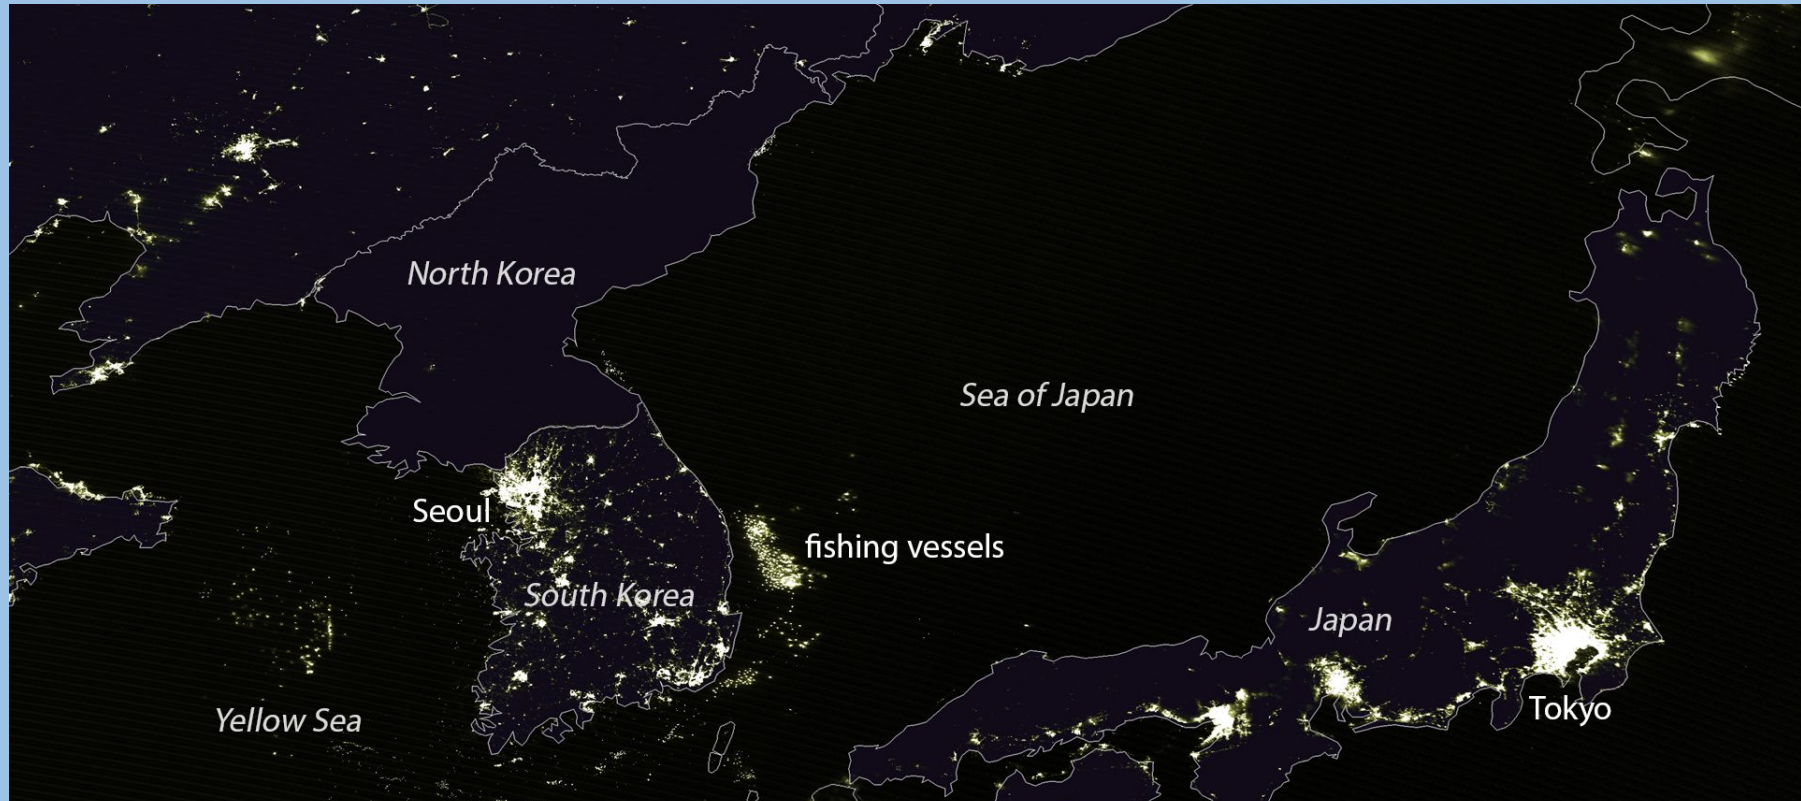

Source: Schwegmann et al, 2016

Radiómetro de Imágenes en el Infrarrojo Visible (VIIRS)

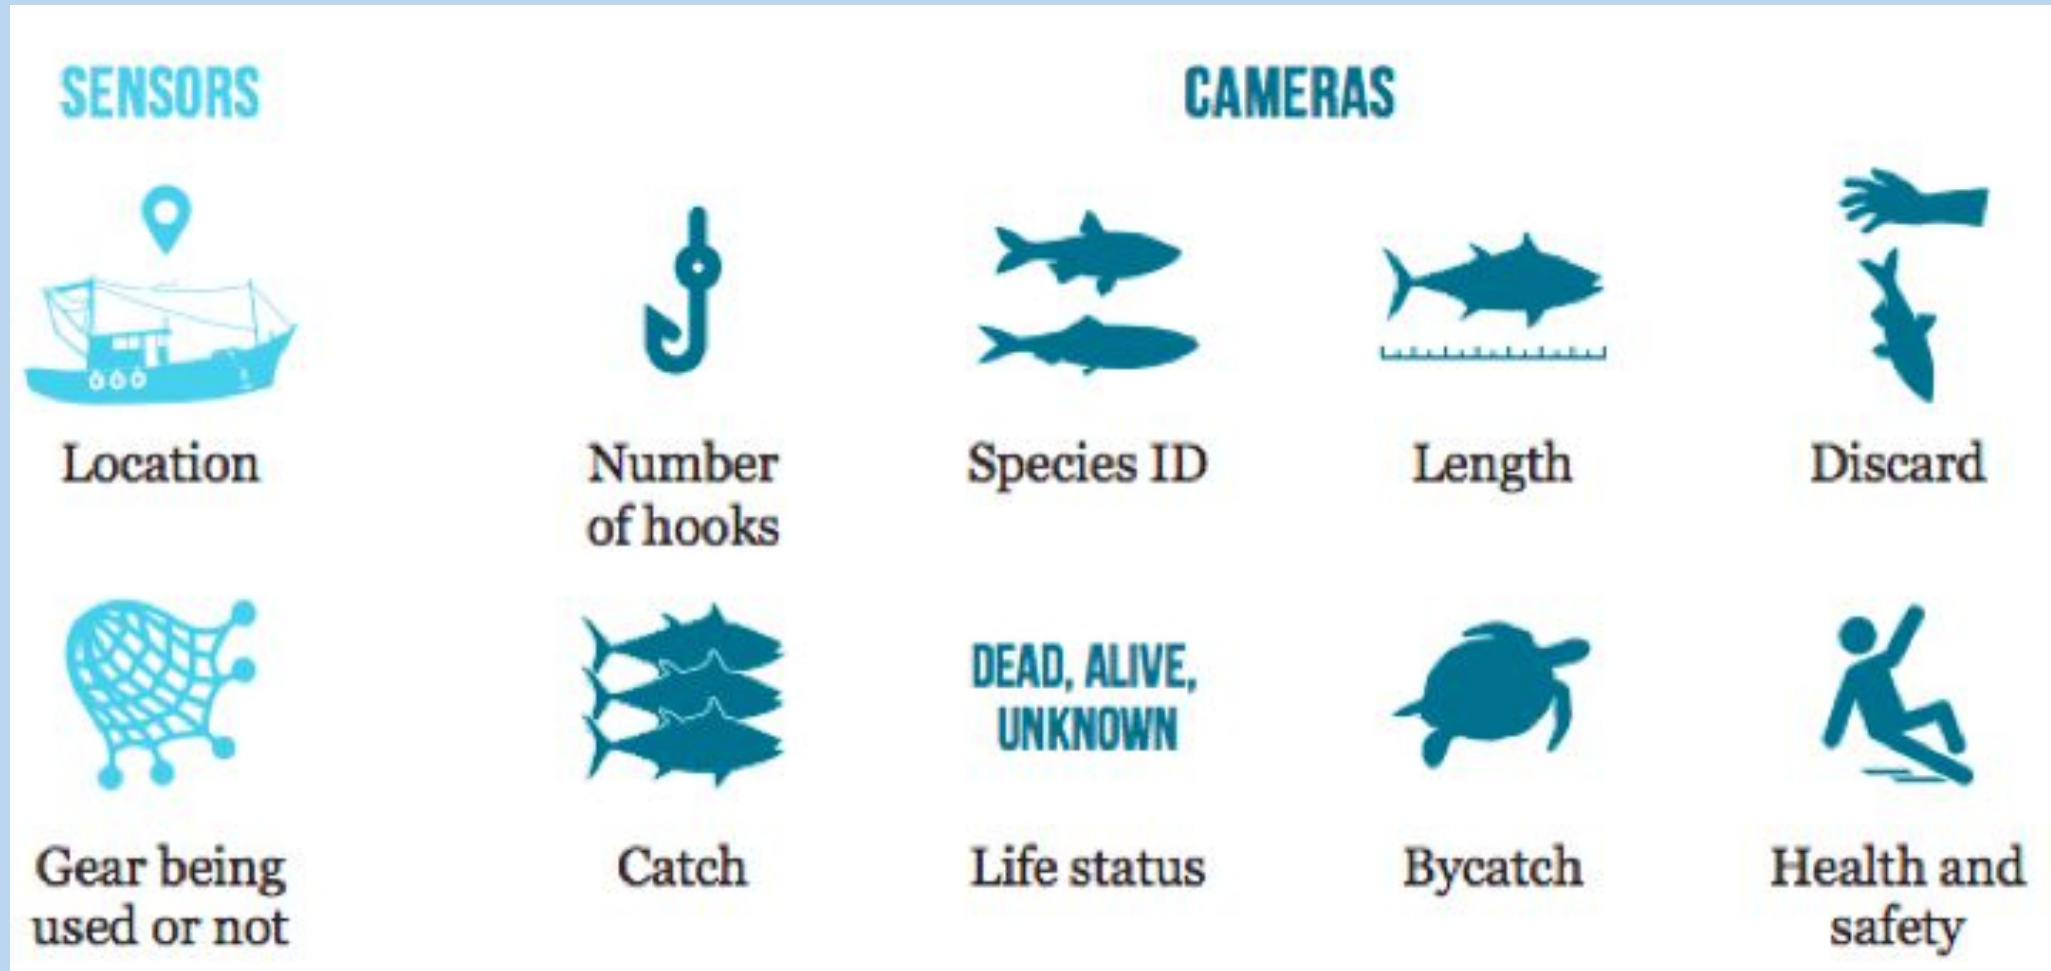

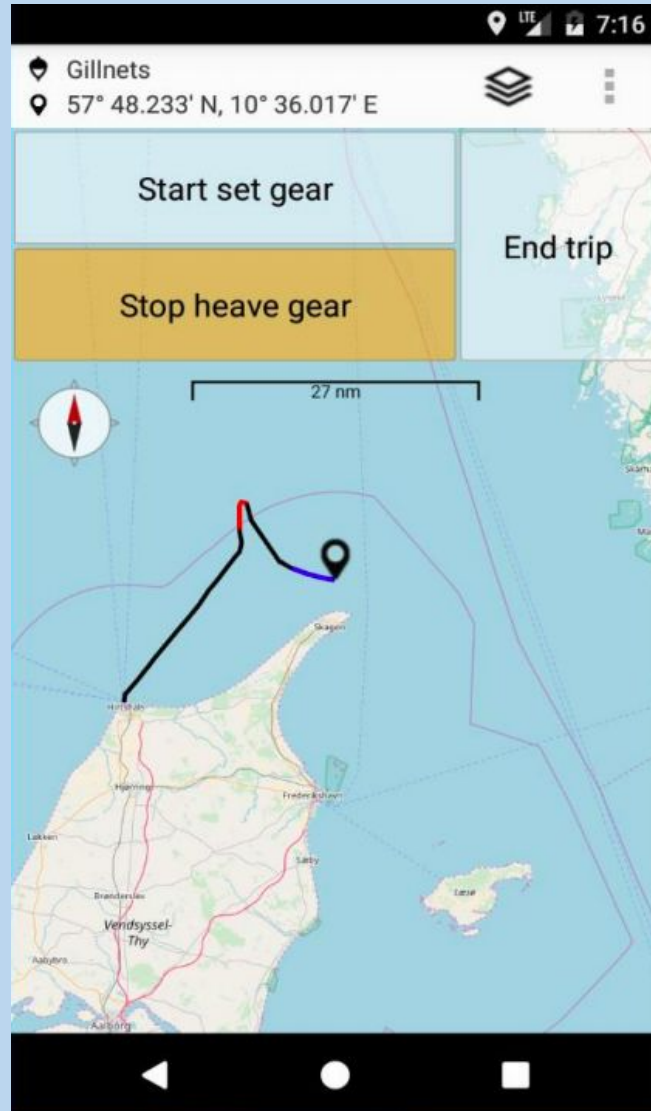

CCTV/sistemas de monitoreo electrónico (EMS)

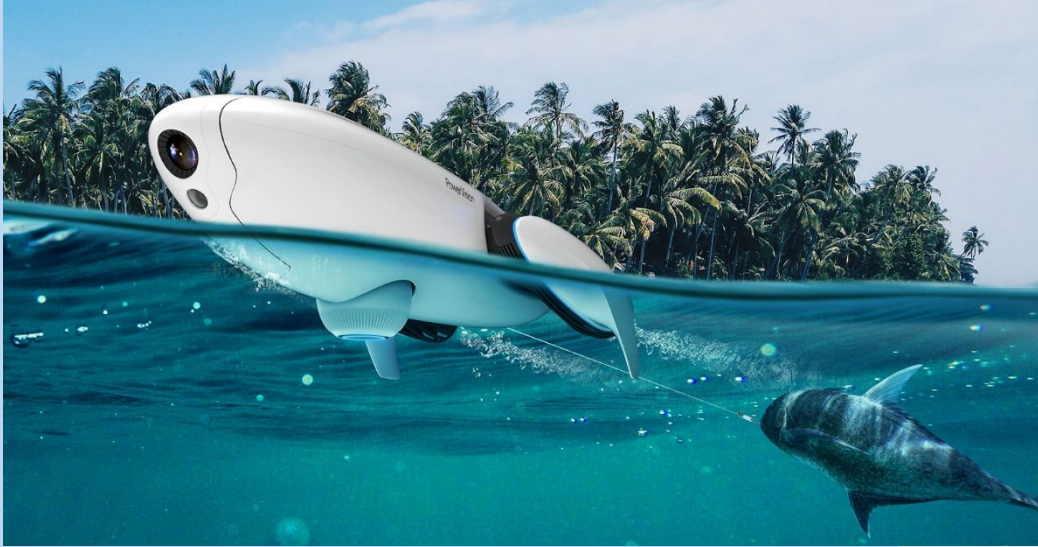

E-monitoring

E-reporting

Drones

Best MCS practices in the fisheries context

- 1) RFMOs
- 2) International MCS platforms and networks (e.g. IMCS network)
- 3) Civil society initiatives (e.g. Global Fishing Watch, FISH-i Africa Task Force)

Caso de estudio

Argos Froyanes
Partners for sustainability

Caso de estudio

- **Información**

- Recopilación sistemática, análisis y uso estratégico
- Intercambio de inteligencia a través de un sistema en línea

- **Grupo de trabajo**

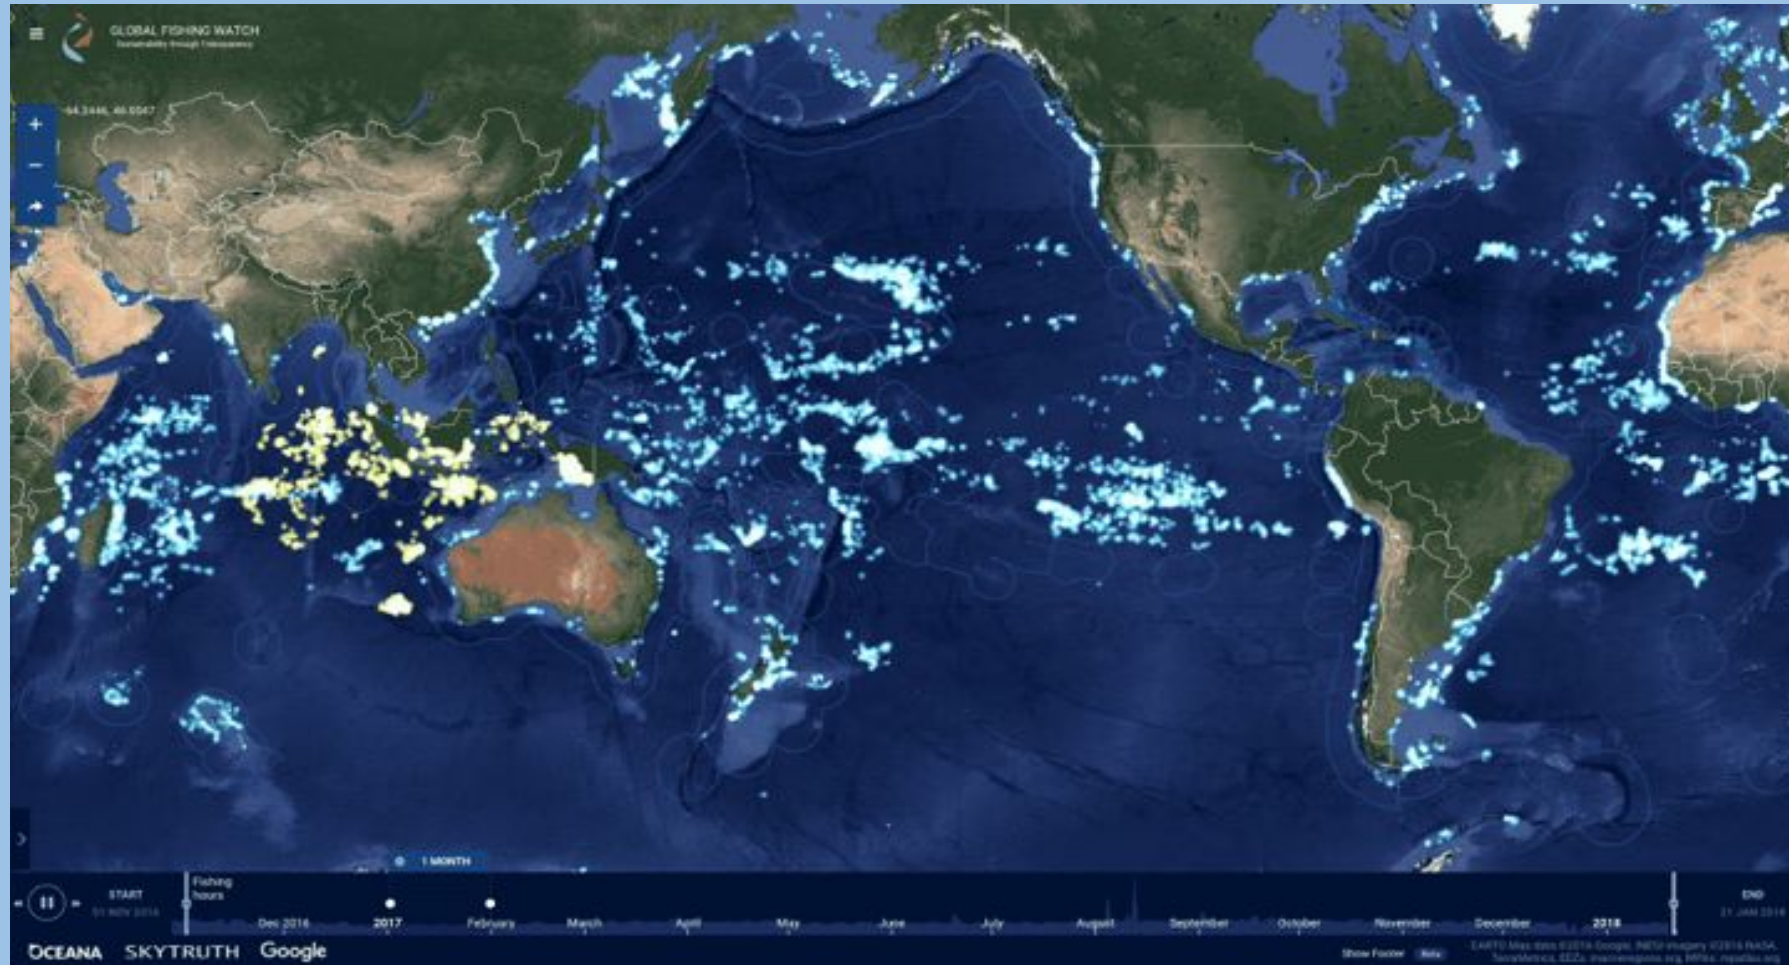

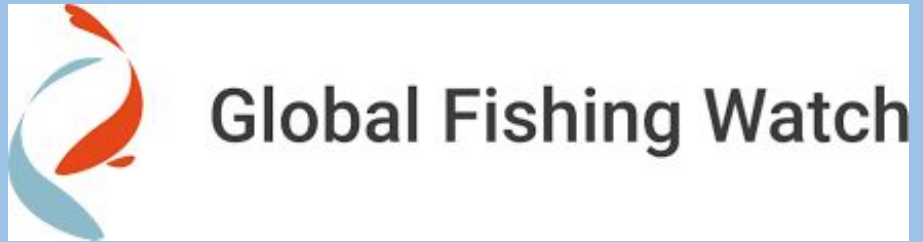

- Reuniones regulares / intercambio
- Cooperación regional mejorada
- Toma de decisiones más eficiente y efectiva con respecto a casos potenciales de pesca IUU

- **Acción coordinada en buques de pesca IUU**
 - Denegación de acceso a buques pesqueros ilegales
 - Descubriendo licencias fraudulentas
 - Desmantelamiento de los buques pesqueros que figuran en la lista IUU
 - Descubrimiento de las identidades falsas de los buques
 - Rastreo y localización de buques escapados

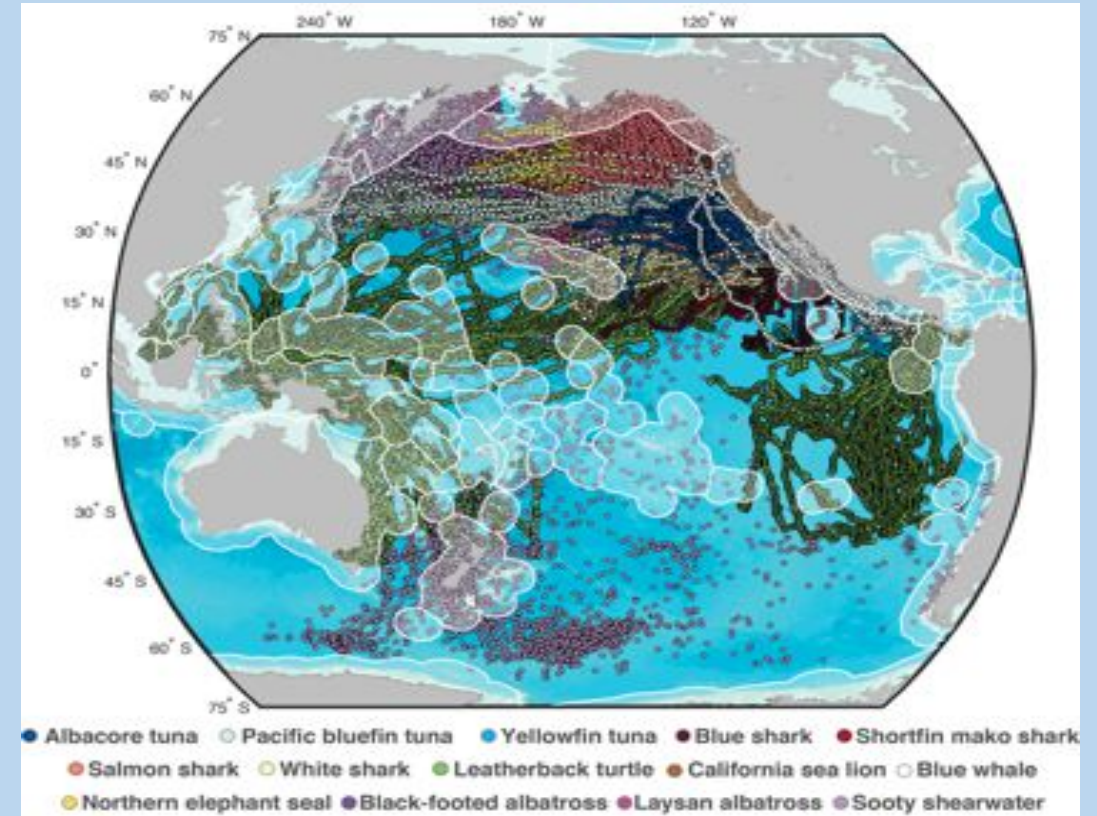

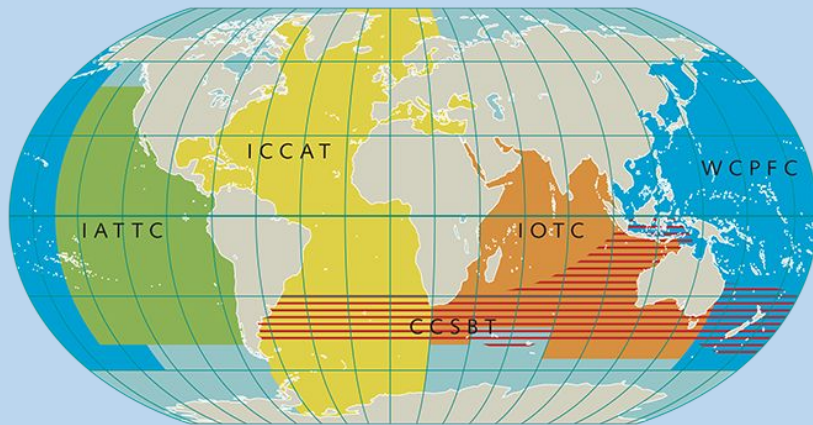

Caso de estudio

MCS challenges

1. Flag State responsibility
2. Governance
3. Lack of capacity

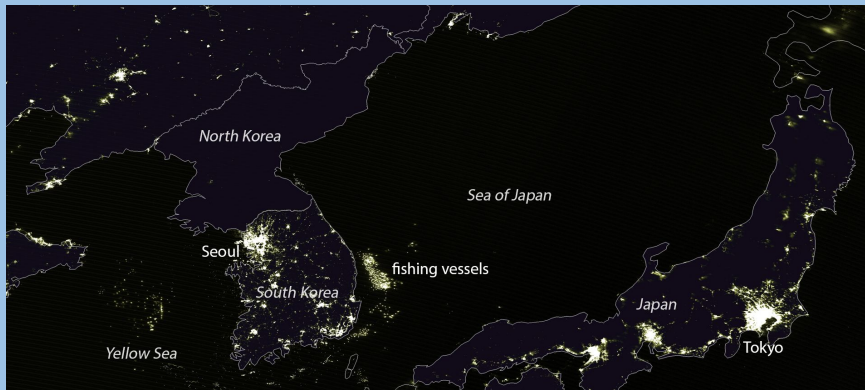

How to strengthen MCS?

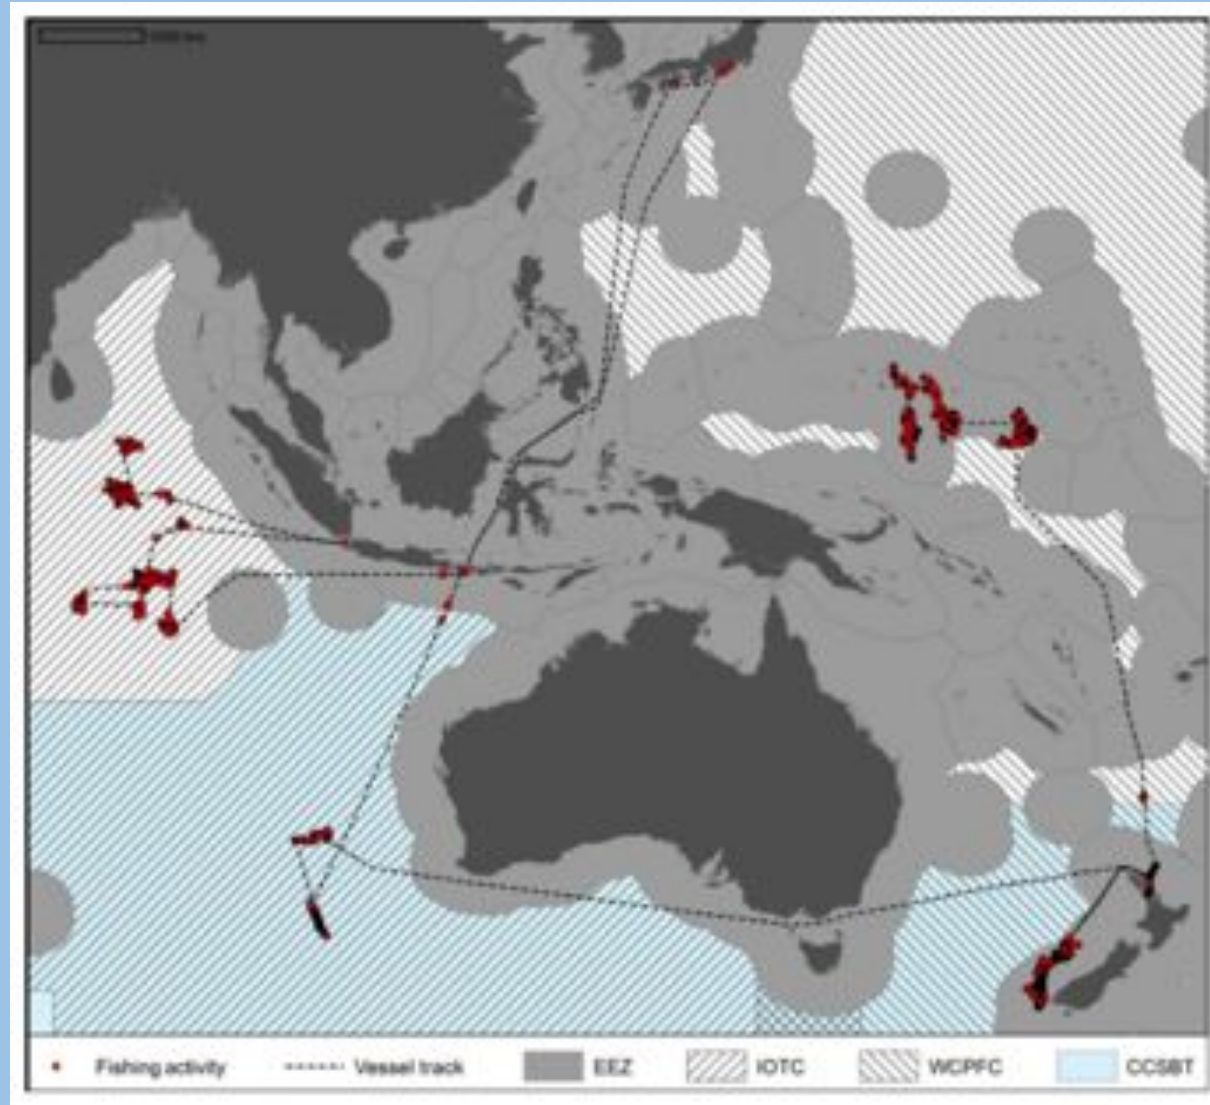

- 1) Technological tools
- 2) Policy options
- 3) Market measures

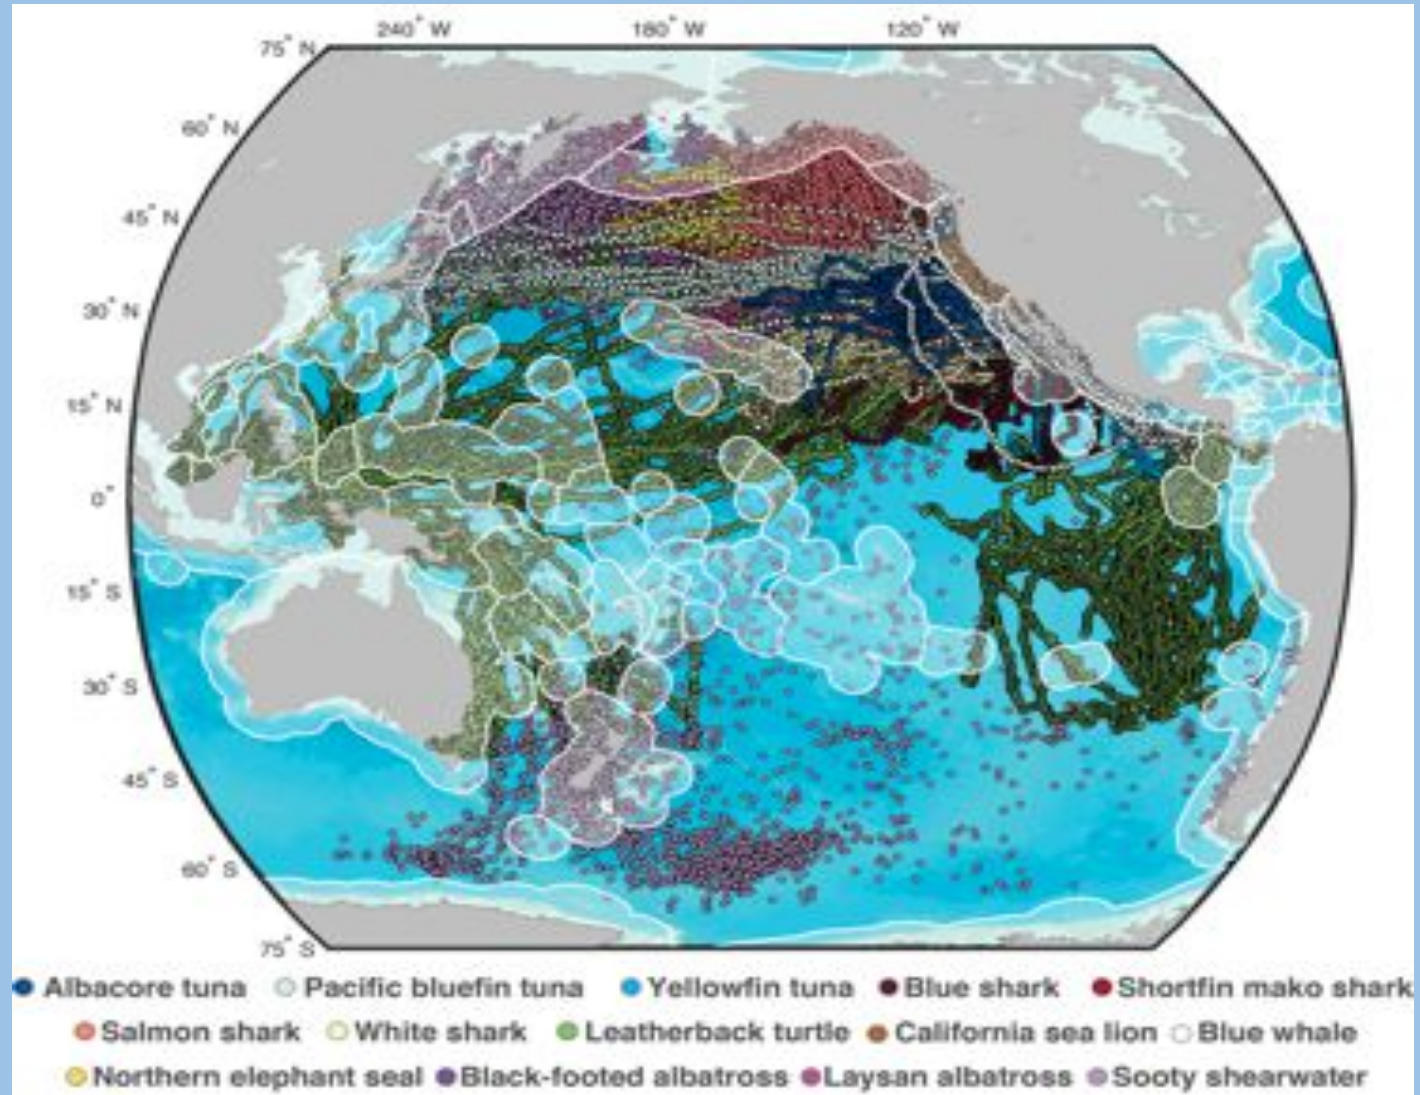

1. La tecnología no es el factor limitante

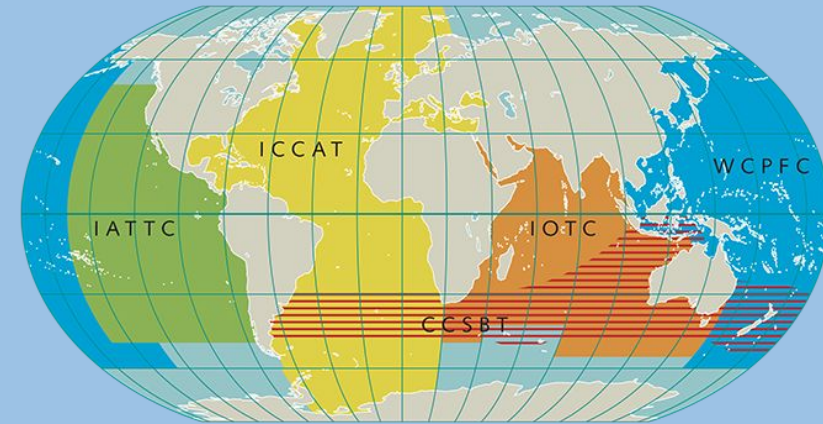

2. Necesidad de coordinación y cooperación

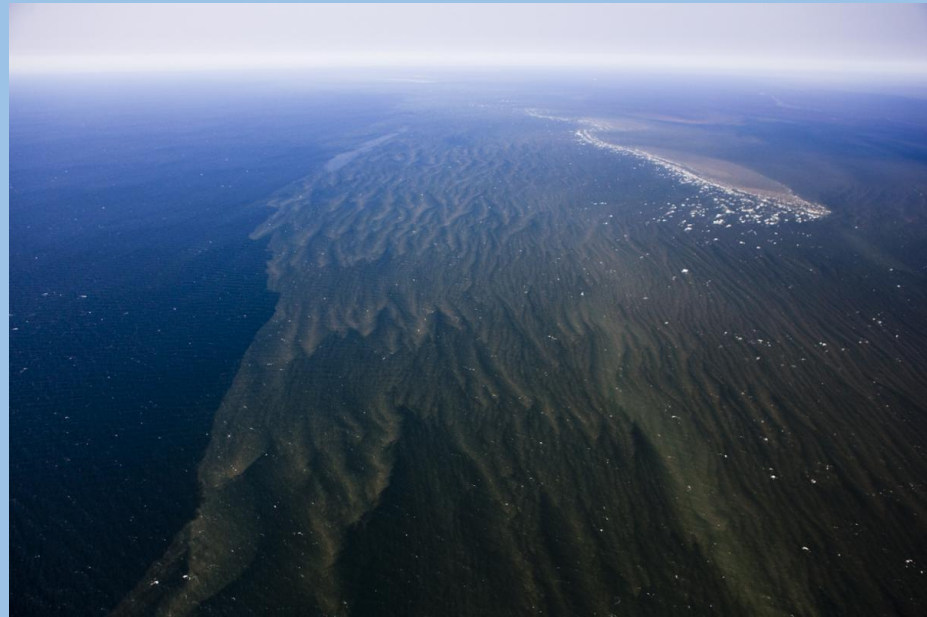

3. Conexión entre la gestión sectorial y la conservación / uso sostenible

4. Teniendo en cuenta todas las partes interesadas

5. MCS: ¡No solo de pesca!

6. MCS: ¡No solo tecnología!

- Coordinación y cooperación
- Regulación y gestión
- Subsidios a la pesca
- Intereses nacionales - por ej. seguridad alimentaria
- Geopolítica

Conclusion: un “two-way street”

MCS necesita:

- Marco de gobernanza que aborda desafíos clave
- Requisitos claros / estándares
- Mecanismos para facilitar la cooperación, la transparencia, el intercambio de información, la supervisión, etc.
- Apoyo para el desarrollo de capacidades

MCS puede:

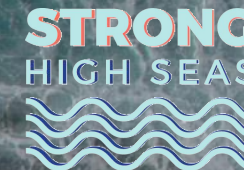

- Contribuir a la implementación efectiva del instrumento
- Soporte a AMBTs, EIAs, ciencias marinas
